

### Math 300 Schedule Spring 2007

There will be short writing assignments in class each week. In addition, there are three papers, two of maximum 5 pages, on assigned topics, and a third of 10-15 pages on a topic of your choice, but the topic must be cleared with the instructor first.

All outlines, drafts and final versions of the three papers should be prepared in Microsoft Word and submitted by the end of Friday as attachments to emails to Professor Tartakoff at dst@uic.edu. Professor Tartakoff will make comments on the drafts and return them electronically. In addition, final versions of each paper must be placed in Tartakoff's mailbox on the third floor of SEO the same day they are due electronically.

No late papers will be accepted.

Here is the schedule:

January 26, outline for paper 1  
February 2, first draft of paper 1  
February 9, second draft of paper 1  
February 16, final version of paper 1  
February 23, outline for paper 2 and choice of topic for paper 3  
March 2, first draft for paper 2 and revisions of topic for paper 3  
March 9, second draft of paper 2 and outline of paper 3  
March 16, final version of paper 2  
March 23, revised outline of paper 3  
April 6, first draft of paper 3  
April 13, second draft of paper 3  
April 20, revised second draft of paper 3  
April 27, final draft of paper 3

I repeat, from bitter experience,

**No late papers will be accepted.**
