Midwest Model Theory Seminar

Model theory of exp and j
Sebastian Eterovic (UC Berkeley)

Abstract: In this talk I will describe some questions that arise from studying the model theory of the complex exponential function, and the work that it has inspired for other functions; in particular, I will present some of the results that have been obtained for the modular j function.

This meeting will be using Cisco Webex - please write an email to jfreitag@uic.edu or mem@math.uchicago.edu to be put on the mailing list with login information. To be added to the mailing list for future seminar announcements, please email jfreitag@uic.edu
