Graduate Professional Development Seminars

From Student to Researcher

Jie Yang (UIC)

Abstract: Do you wonder whether you have the potential to be a researcher? How do you prepare yourself well for your graduate studies? Are you struggling with your thesis research? In this talk, we will discuss the differences between a student and a researcher, important characteristics to be a good researcher, self-training techniques to prepare yourself for incoming research, and possible ways for making progress in your research as a graduate student.

The speaker, Jie Yang, is currently a Professor of Statistics and the Director of Graduate Studies in the Department of Mathematics, Statistics, and Computer Science.

The seminar is jointly organized by Math589 and the DGS Office. It will be held at UIC zoom. The zoom link will be announced via emails. In case you could not find the link, please email Professor Jie Yang at jyang06@uic.edu.
