Abstract: Are you potentially interested in careers in business, industry, or government (BIG)? Come hear about summer 2023 internship experiences through the Internship Network in the Mathematical Sciences (Inmas) program, and how the program can help you prepare for your career in the coming years. Associate director Dr. Luke Leisman, will share about upcoming training and industry opportunities and UIC grad students will share about their internship experiences at companies working in medical imaging, climate solutions, beehive health, and more. Inmas is an NSF-funded, multi-university initiative that has as its mission to provide high-quality training and internship experiences that broaden career opportunities for graduate students in the Mathematical Sciences. A key goal is to demonstrate the value that mathematicians can add to organizations that might not have large established internship programs already.

Food will be provided.
