

Mathematical Computing Laboratory

Spring Research Expo

MCL Members (University of Illinois at Chicago)

Abstract: The end-of-semester research expo is the MCL's main public event, where student research teams present posters and demonstrations of their work from the preceding semester. Faculty and graduate students who will be sponsoring upcoming MCL projects will also be on hand to answer questions. Attending the expo is a great way for UIC students to find out about undergraduate mathematical research opportunities.

Pizza will be served.
