

RTG Workshop Talk

Introduction to geometric structures on manifolds

Daniele Alessandrini (University of Heidelberg)

Abstract: This will be an introduction to the theory of geometric structures on manifolds, their developing maps and holonomy representations, and their associated bundles endowed with a flat connection and a transverse section.

The talk is part of the 2-day meeting ["RTG Workshop on the Geometry and Physics of Higgs bundles II"](http://schapos.people.uic.edu/Higgs-2017.html)
