

Undergraduate Mathematics Symposium

Saturday, October 9, 2010

A symposium on undergraduate research in mathematics

Featuring invited lectures by senior mathematical researchers and
contributed lectures by undergraduates on their own research projects

Plenary Lectures:

Laura DeMarco / UIC

The Mandelbrot set: What we know today

George Francis / UIUC

The art of Tony Robbin and visualizing four and
more dimensions

Sergei Tabachnikov / Penn State

The Tait-Kneser theorem: Variations on the theme

Register online

The symposium is free and open to everyone with an interest in undergraduate mathematics research and education. Register to attend by completing a short form on the symposium web site. Lunch will be provided for all participants.

Find more information or to register, visit the symposium web site:

<http://www.math.uic.edu/conferences/ums/>

Questions or comments? Contact the organizers:

David Dumas (ddumas@math.uic.edu)

Steven Hurder (hurder@math.uic.edu)

The symposium is supported by a grant
from the National Science Foundation.
